## OUR COMPANY

PT. KENZAZIA KIA KAYANA established in June 2020 starting from our concern about the very low price of cassava and uneducated way of planting and harvesting cassava which has big impact to standard of living of local cassava farmers in our region. We worked and collaborated with local farmers and its small units of local farmer's cooperatives to move cassava to be popular food ingredient in the world with high value inside that potentially can improve the farmer well being , it called MOCAF ( Modified Cassava Flour ).

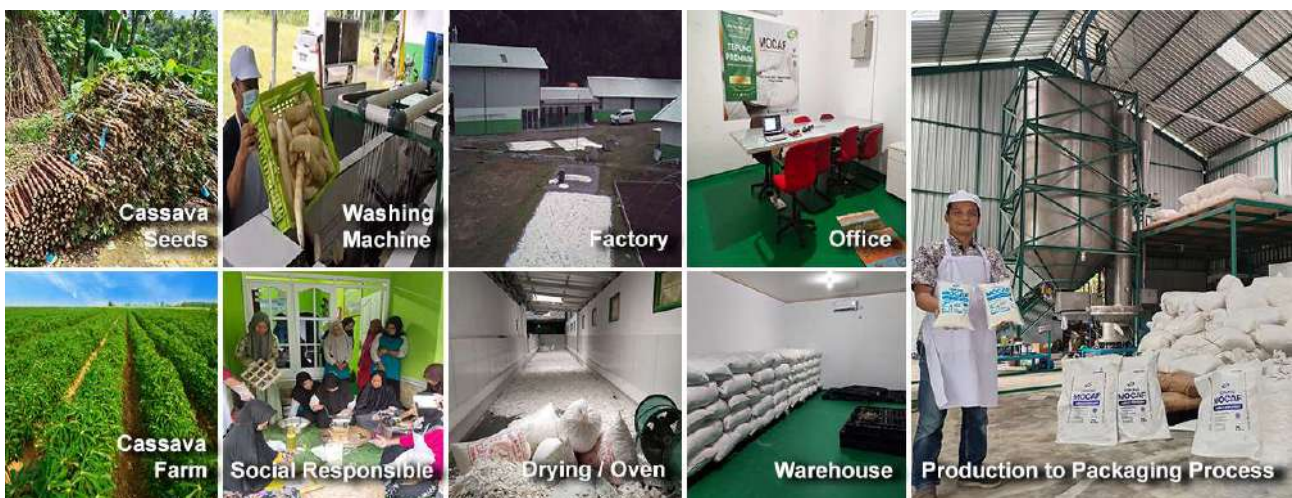

In 2020 Indonesia is among The 5 Largest Cassava Producers in the world with 18.3 million tons with land area of more than 600 Thousand Hectares distributed in 13 provinces with less optimal utilization.

We directly implement government programs on Food Security by empowering and developing cassava farmers , this is a real way to improve farmers' living standards.

The most important thing our contribution for the world that we are participating in implementing one of World Health Organization ( WHO ) Programs in reducing diabetics which reach 537 million people in the world by creating variety of foods which less sugar, gluten free, dietary fiber, safe and delicious for human consumption.

Our factory is located in Central Java - Indonesia. This is standing on area of 5.000 Square Meters and fostering more than 150 cassava farmers spread over 2 Districts with an agricultural land area more than 3000 Hectares with a stable production capacity is 40 M/Tons per Month and will continue to be increased to reach 100 M/Tons per Month by target mid of 2023 , supported by upgrading of production machines , supporting facilities and improvement of the quality of human resources.

### Our Company at Glance
